BEDTIME MATH PROGRAM

Open to ages 4-11. Sign-ups are at the same time as SRP sign ups. Participants receive a star chart and stars when they sign-up. This is an online program that has children use the Bedtime Math website to solve fun math questions (answers are always included so they can access them as soon as they want to). For every math question they try (and it doesn't matter if they get it right or not, just that they try) participants place a star on their Bedtime Math star chart. When their chart is completed, they can stop by the library and show a children's librarian their completed chart to enter their name into a drawing for prizes.
